This announcement does not constitute an offer to sell, or an invitation to offer or buy or subscribe for, securities. An investment in the Offered Shares involves substantial risks and uncertainties. Prospective investors should read the entire prospectus, and, in particular, should see "Risk Factors" for a discussion of certain factors that should be considered in connection with an investment in the Offered Shares, including the risks that (i) even though the Company has obtained regulatory approval (CE-mark) in Europe for the Genio[®] system based on first positive clinical trial results, this does not imply that clinical efficacy has been demonstrated and there is no guarantee that ongoing and future clinical trials intended to support further marketing authorizations (such as in the US) will be successful and that the Genio[®] system will perform as intended, (ii) the Company's future financial performance will depend on the results of ongoing and future clinical studies and the commercial acceptance (including reimbursement) of the Genio[®] system (the Company's only commercial-stage product at the date hereof), (iii) the Company has incurred operating losses, negative operating cash flows and an accumulated deficit since inception and may not be able to achieve or subsequently maintain profitability, (iv) the Company will likely require additional funds in the future in order to meet its capital and expenditure needs and further financing may not be available when required or could significantly limit the Company's access to additional capital. Not taking into account any proceeds of the Offering, the Company does not have sufficient working capital to meet its working capital needs for a period of at least 12 months from the date of the prospectus. All of these factors should be considered before investing in the Offered Shares. Prospective investors must be able to bear the economic risk of an investment in shares in the Company and should be able to sustain a partial or total loss of their investment.
