Forward-Looking Statements

Please read the following before continuing. This presentation has been prepared by the management of Nyxoah SA (the "Company"). It does not constitute or form part of, and should not be construed as, an offer, solicitation or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or any member of its group nor should it or any part of it form the basis of, or be relied on in connection with, any contract to purchase or subscribe for any securities of the Company or any member of its group, nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever. It is not a prospectus or offering memorandum.

The information included in this presentation has been provided to you solely for your information and background, speaks as of today, and is subject to updating, completion, revision and amendment and such information may change materially from time to time. No person is under any obligation to update or keep current the information contained in this presentation and any opinions expressed in relation thereto are subject to change without notice. No representation or warranty, express or implied, is made as to the fairness, accuracy, reasonableness or completeness of the information contained herein. Neither the Company nor any other person accepts any liability for any loss howsoever arising, directly or indirectly, from this presentation or its contents.

This presentation includes statements that are, or may be deemed to be, "forward-looking statements" within the meaning of The Private Securities Litigation Reform Act of 1995. In some cases, forward-looking statements can be identified by the use of forward-looking terminology, including the words "believes", "estimates", "anticipates", "expects", "intends", "may", "will", "plans", "continue", "ongoing", "potential", "predict", "project", "target", "seek" or "should" or, in each case, their negative or other variations or comparable terminology or by discussions of strategies, plans, objectives, targets, goals, future events or intentions. Forward-looking statements include statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the Company's results, condition, performance, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve known and unknown risks and are subject to uncertainties and assumptions. New risks can emerge from time to time, and it is not possible for the Company to predict all such risks. The Company cannot assess the impact of all such risks and uncertainties on its business or the extent to which any risks or uncertainties, or combination of risks or uncertainties and other factors, may cause the Company's actual results, condition, performance, prospects, growth or opportunities, as well as those of the markets it serves or intends to serve, to differ materially from those contained, expressed or suggested in any forward-looking statements in this presentation. Forward-looking statements are not guarantees of future performance. Even if the Company's results, condition, and growth and the development of the industry in which the Company operates are consistent with the forward-looking statements contained in this presentation, those results or developments may not be indicative of results or developments in future periods. Given these risks and uncertainties, the reader should not rely on forward-looking statements as a prediction of actual results. The Company and each of its directors, officers and employees expressly disclaim any obligation or undertaking to review, update or release any update of or revisions to any forward-looking statements in this presentation or any change in the Company's expectations or any change in events, conditions or circumstances on which these forward-looking statements are based, except as required by applicable law or regulation. More detailed information about the risks and uncertainties affecting the Company is contained in filings the Company has made and may make with the U.S. Securities and Exchange Commission in the future or in documents that the Company has published or may publish on its website.

This document and any materials distributed in connection with this document are not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction. The distribution of this document in certain jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe any such restrictions. The Company cannot be held liable should these restrictions be breached by any person.

Investment Highlights

Significant Underpenetrated Global OSA Market Opportunity

- 425m moderate-to-severe OSA patients globally eligible for treatment
- >1m OSA patients eligible for HGNS treatment annually in US and Europe
- HGNS treatment solution now fully accepted by physicians and payors

Innovative Patient-Centric Technology

- Single-incision procedure with a scalable technology platform
- Bilateral stimulation with external power source and no lead tunneling
- Full-body 1.5T and 3.0T MRI compatibility

Growing Body of Strong Clinical Data

- BETTER SLEEP demonstrated safety and efficacy in both non-CCC and CCC patients
- DREAM IDE pivotal trial to secure US regulatory approval in H1 2024
- ACCCESS IDE study to secure US approval for CCC patients in H1 2025

Targeted Commercial Strategy

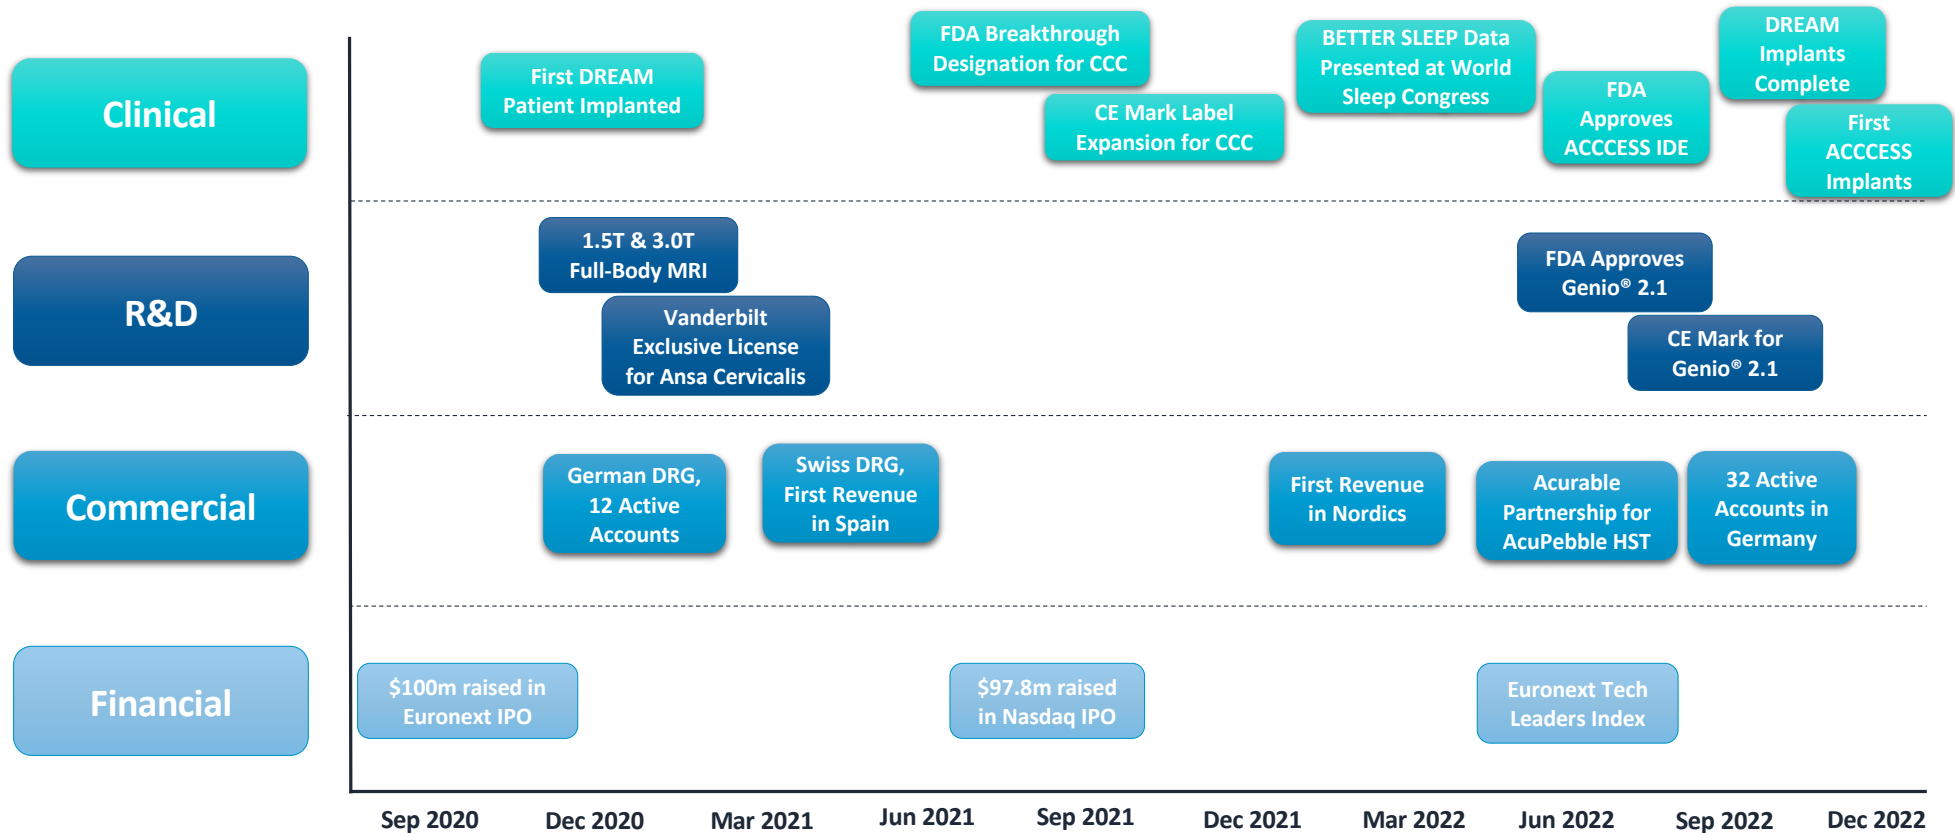

- CE Mark with first European sales in 2021
- Commercial proof of concept through expected market leadership in Germany in Q4 2022
- US pre-commercial activities focused on market access and payor coverage

Healthy Financial Position

- Dual-listed (NYXH) company trading on Nasdaq and EuroNext stock exchanges
- €115 million cash balance after two successful IPOs, which brought in top tier investors
- Ample liquidity to fund key R&D, clinical, and commercial priorities into 2024

Executing on Our Strategic Priorities

Euronext IPO – Present

Experienced Board and Management Team

Robert Taub

Founder, Chairman

- Serial entrepreneur in the pharmaceutical and medical fields
- Co-founded and co-managed Octapharma – Human plasma protein company
- Founded and managed Omrix Biopharmaceuticals – NASDAQ IPO, followed by the acquisition by J&J
- Early investor and chairman of Neuroderm, a Parkinson's disease pharmaceutical company – IPO on NASDAQ and later sale to Mitsubishi-Tanabe

Olivier Taelman

Chief Executive Officer

- Experienced Medtech leader
- 7 years in pharmaceutical healthcare at Eli Lilly and Sanofi Aventis leading specific Business Units
- 18 years within the field of Medtech neuromodulation at Medtronic, managing EMEA at Stryker NeuroVascular and serving a neuromodulation company Nevro where he was responsible for building the European business during the successful NASDAQ IPO
- Joined Nyxoah in July 2019 as Chief Operating and Commercial Officer, subsequently being appointed as CEO in November 2019.

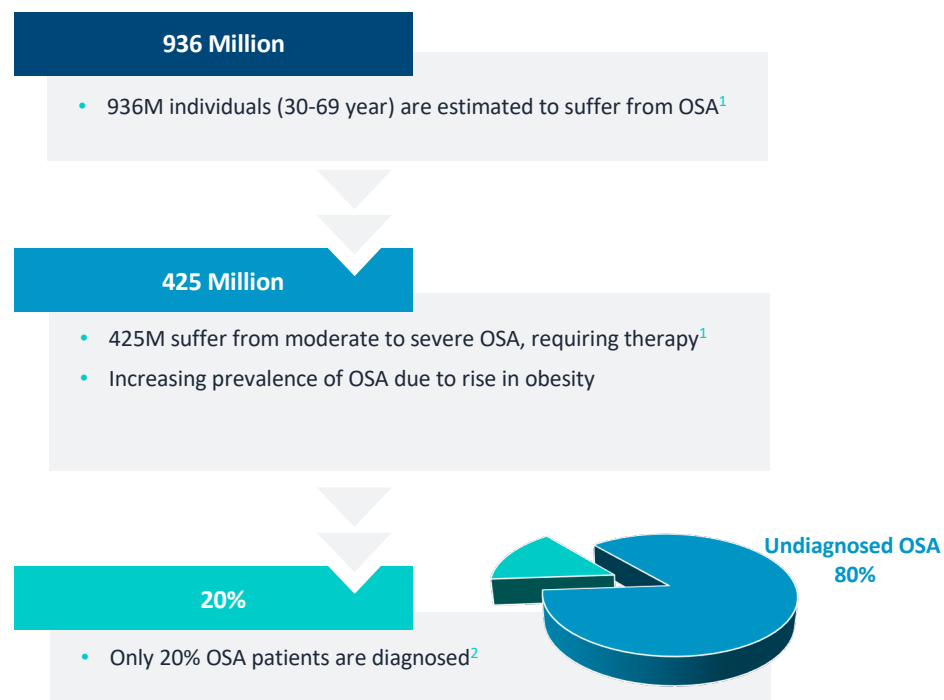

Loïc Moreau

Chief Financial Officer

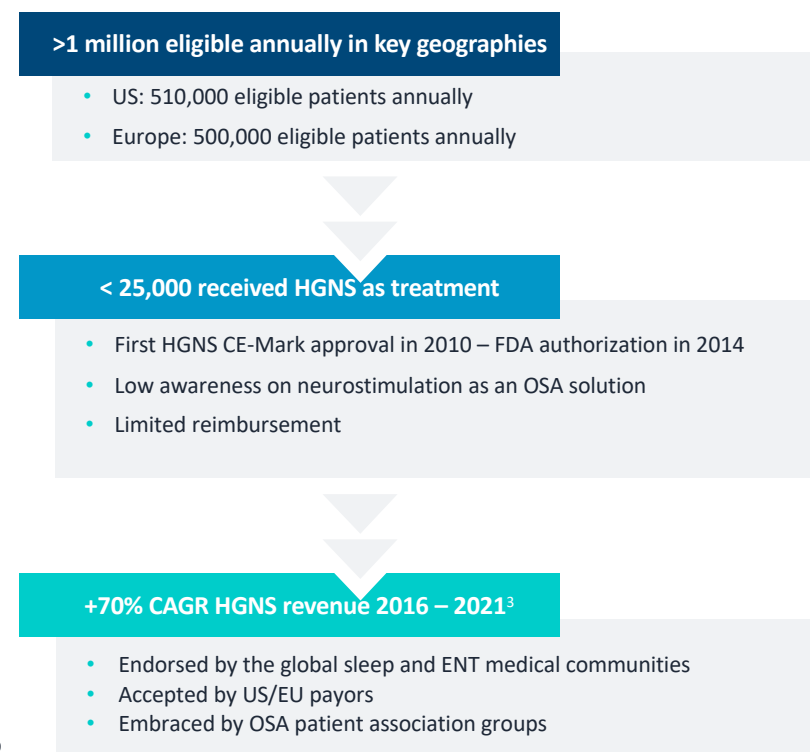

- Experienced Finance leader
- 13 years in Pharmaceutical healthcare at GSK with roles in Corporate Development/ M&A (UK), Finance R&D (UK) or Country CFO where he notably led and structured the various support functions for GSK business in France (€1bn+ turnover)
- Started his career at EY (external audit) followed by PwC (Corporate Finance)
- Joined Nyxoah in 2022 to take the leadership of the finance department.

Large and Underpenetrated Global OSA and HGNS Market Opportunity

Worldwide Obstructive Sleep Apnea Prevalence

Hypoglossal Nerve Stimulation Market Opportunity

1. Benjafield, Adam V et al. Estimation of the global prevalence and burden of obstructive sleep apnoea: a literature-based analysis. Lancet Respir Med 2019

2. Harvard Medical School Division of Sleep Medicine, The Price of Fatigue - The surprising economic costs of unmanaged sleep apnea, December 2010

3. Presents annual revenue growth for Inspire Medical. Inspire Medical corporate presentation – February 2022

A Disruptive Patient-Centric Solution TODAY...

Single incision procedure

Leadless and
battery-free

Full-body 1.5T and 3T MRI
compatible

Bilateral stimulation

CCC FDA breakthrough designation
CCC indication in Europe

Scalable platform

Genio® Implantable Stimulator

Genio® Activation Chip

Nyxoah

Our Vision: Improving Lives Through Restful Nights

Connectivity & Remote Care

- Connectivity with remote smartphone application
- Cloud based access for patients and physicians

Patient Engagement

- Feedback to / from the patient for optimized compliance & comfort

Predictable Outcomes & Auto-Titration

- Patient acclimation through amplitude adjustment @ home
- Sensors for adaptive therapy & auto-titration

Nyxoa

The Genio® Duty Cycle Approach to Hypoglossal Nerve Stimulation

The Genio® proprietary Duty Cycle algorithm

1 Respects the patient physiological breathing

- The patient breathing frequency is used as a reference to adjust the stimulation cycle

2 Ensures a timely and efficient stimulation, through Duty Cycle

- Genio® Duty Cycle algorithm: alternance of ON/OFF stimulation phases in a cyclical pattern
- The cyclical “ON” phase overlaps with the target window (end of expiration + early inspiration) to deliver a timely stimulation
- The “OFF” phase prevents the occurrence of nerve and muscle fatigue

3 Validated by clinical evidence

- Data presented in a poster at the 26th Congress of the European Sleep Research Society in Sep 2022
- Optimal programming allows for a stimulation overlap with inspiration phase as high as 82% of cycles
- The study demonstrated that “customized patient programming strategies to maximize therapeutic effect of bilateral HGNS can be achieved by adjusting stimulation parameters without the need for a sensing lead”

Genio® algorithm example

Nyxoah[®]

The Genio® System – Addressing Unmet Patient and Physician Needs

Single incision procedure

- Extended operative time is associated with increased risk of surgical site infection¹³

Leadless

- Up to 25% failure rate of percutaneous leads after 5Y

External power-source

- Device replacement and revision procedures are associated with a two-to four-fold higher risk of infection

Bilateral stimulation

- Genio® indicated for non-CCC and CCC patients
- No need for a DISE to exclude CCC at the soft palate level

MRI compatibility

- >40 Million MRI scans performed in 2020 in OSA patients¹⁷
- 60% MRI scans are performed in the thorax/abdominal area¹⁷
- 40% MRI scans are 3T

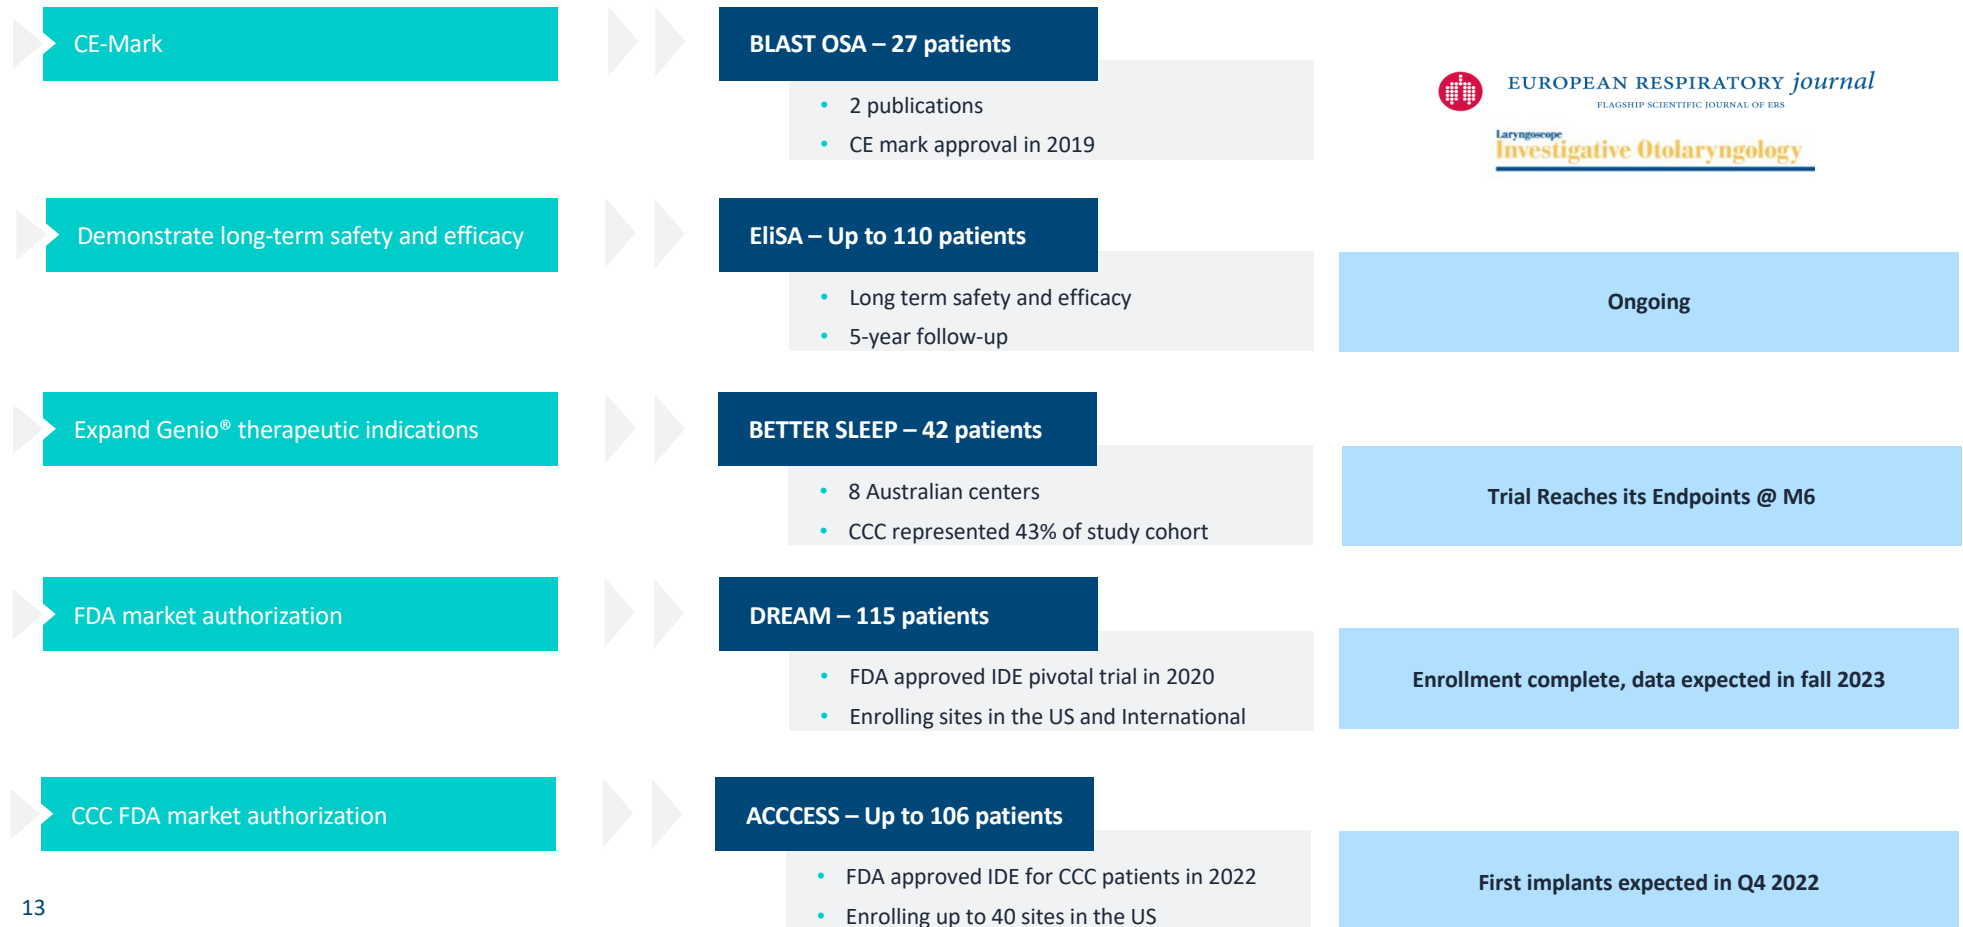

Implantable parts	1 – Genio® IS	3 – Pulse generator + 2 leads	2 – Pulse generator + lead
Number of incisions	1 incision	2 incisions	2 incisions
Lead(s)	0 – No lead	2 – Stimulation and breathing	1 – Stimulation
Tunneling	No tunneling	At least 1 step	1 step
Power source	External	Implanted battery	Implanted battery
Estimated implantation time	1 hour	2.5 hours	2 hours
MR conditional labeling	Full-body 1.5T and 3.0T	1.5T only	No

Clinical Strategy

Building Robust Clinical Evidence

BETTER SLEEP Study – Demonstrated Efficacy for Both Non-CCC and CCC Patients

Population and key inclusion criteria	22 < Age < 75	Multicenter, prospective, open-label, two group study	With and without complete concentric collapse (CCC)
	BMI < 32 kg / m ²	Moderate to Severe OSA – AHI 15-65	Failed, did not tolerate, or refused PAP
	Target: 42 patients		

Safety and Performance

- Safety: Incidence of device-related serious adverse events (SAEs)
- Efficacy Endpoints
 - Primary: Mean reduction in AHI (4% oxygen desaturation, AHI_{4%}) for the entire cohort
 - Exploratory: Mean reduction in AHI₄ for the CCC subgroup
 - Secondary: Mean reduction in oxygen desaturation index scored at 4% desaturation (ODI_{4%}) for the entire cohort

BETTER SLEEP

Responder Rate – Sher Criteria

- 36 patients completed polysomnography at month 6
- Responder defined according to the Sher criteria²² ($\geq 50\%$ reduction in AHI and AHI less than 20)
- Strong responder rates help de-risk DREAM U.S. IDE study

	AHI _{4%} Responder Rate – Sher Criteria –
CCC & Non-CCC – n=36	64%
CCC – n=15	60%
Non-CCC – n=21	67%

Results subject to final review and validation

BETTER SLEEP

Improvement in $AHI_{4\%}$ in Responders

- >70% reduction in $AHI_{4\%}$ in responders in both CCC and non-CCC population
- Presence of “Super Responders” in both CCC and non-CCC cohorts provides additional validation

AHI responders	– $AHI_{4\%}$ – Mean % reduction at 6 months
Entire cohort (n=23)	73.4%
CCC cohort (n=9)	71.1%
Non-CCC cohort (n=14)	74.9%

BETTER SLEEP – Data from the entire cohort

BETTER SLEEP

CCC Market Expansion Opportunities

Europe

- CE Mark label expansion to include CCC patients in Europe
- CE-Mark Instructions for use: *“The Genio® system is indicated to treat patients suffering from moderate to severe OSA with and without Complete Concentric Collapse (CCC) at the soft palate level”*
- No DISE required to assess presence of CCC at the soft palate level

United States

- Genio® received “Breakthrough Device Designation” in the US for CCC patients
- ACCESS IDE approved, first patients expected to be implanted in Q4 2022
- FDA approval expected in the first half of 2025

DREAM Study – IDE Pivotal Trial

Population and key inclusion criteria

22 < Age < 75

Failed, did not tolerate, or refused PAP

Combined central / mixed AHI > 25% total AHI excluded

BMI < 32 kg / m²

Moderate to Severe OSA – AHI 15-65

CCC of soft palate excluded

Target: 115 patients

Safety and Performance

- Safety: Incidence of device-related serious adverse events at 12 months
- Co-primary effectiveness endpoints: Percentage of responders at 12 months based on Apnea Hypopnea Index (AHI4%) using the Sher criteria and percentage of responders at 12 months based on ODI4% (25% reduction of ODI between baseline and 12-month visit)

Status

- FDA approved IDE pivotal trial in June 2020
- 20 US sites activated, screening, enrolling and implanting patients
- Mix of large academic centers & private practices, all HGNS experienced
- Enrollment complete, data expected in Fall 2023

ACCESS Study – IDE Trial to Gain US Approval for CCC Patients

Population and key inclusion criteria

22 < Age < 75

Failed, did not tolerate, or refused PAP

Central / Mixed Events < 25% of Total

BMI < 32 kg / m²

Moderate to Severe OSA – AHI 15-65

Target: Up to 106 patients

Safety and Performance

- Safety: Incidence of device-related serious adverse events through 12 months
- Co-primary effectiveness endpoints: Percentage of responders at 12 months based on Apnea Hypopnea Index (AHI4%) using the Sher criteria and percentage of responders at 12 months based on ODI4% (25% reduction of ODI4 between baseline and 12-month visit)

Status

- FDA approved IDE pivotal trial in July 2022 – up to 40 participating sites
- Mix of large US academic centers & private practices, all HGNS experienced
- First patients expected to be implanted in Q4 2022
- FDA approval expected in the first half of 2025

Commercial Leadership Through Focused Execution

Go Deep versus Go Wide

Stakeholders

- ENT implant surgeon
 - Quality implant
- Sleep physician
 - Patient phenotyping
 - Patient outcomes
- Referral network
 - GPs, cardiologists

EU Market Access

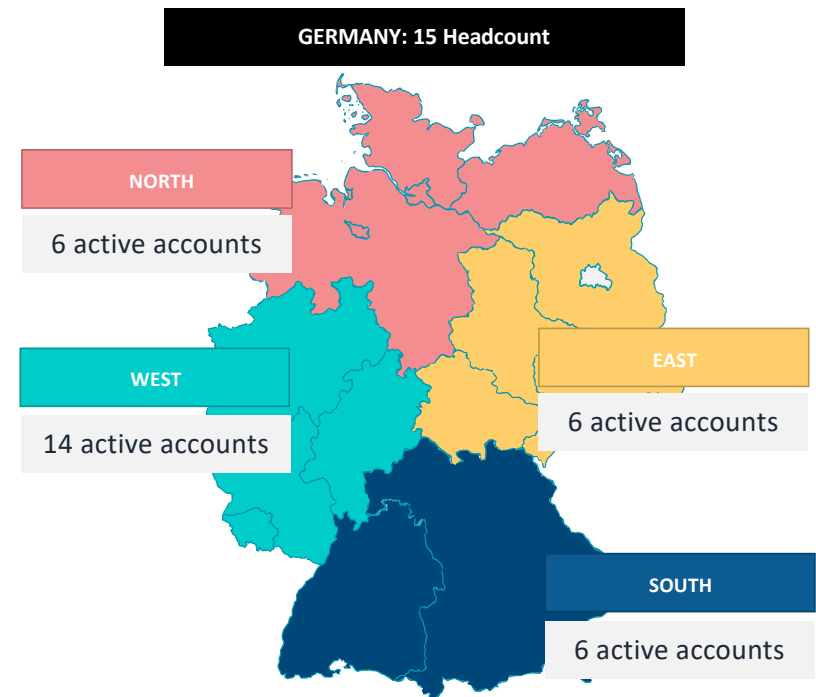

Nyxoah – EU reimbursed countries

- Germany – 2021: Dedicated DRG
- Switzerland – 2021: Dedicated DRG
- Spain – 2021: Funding through hospital budget
- Finland -- 2022

Nyxoah – EU reimbursement opportunities

- Belgium
- Italy
- Nordic Countries

Germany - Proof of concept

Acurable Home Sleep Test German Partnership

AcuPebble Aligns with Nyxoah's Patient-First Mission Statement

A Next-Generation Home Sleep Test

- CE Mark and FDA clearance
- High specificity and sensitivity for AHI and ODI, which is validated by a randomized study [published in the BMJ Open](#)

Patient-Centric Design

- **Highly accurate** – >93% and >91% specificity and sensitivity for AHI and ODI compared to gold-standard polygraphy
- **Easy to use** – patients download APP and follow simple instructions
- **Comfortable** – small system worn at the base of neck at night
- **Reusable** – can be used for routine monitoring, including on multiple consecutive nights
- **Novel form factor** – aligns with trend towards wearable technology

With AcuPebble and Genio, Nyxoah can now offer patients and clinicians the most cutting edge OSA home sleep diagnosis and treatment solutions

High Quality and Diverse International Shareholder Base

Euronext IPO

- September 2020
- Base offering & over-allotment: €85M (\$100M)

Nasdaq IPO

- July 2021
- Base offering & over-allotment: \$97.8M

Current Shareholder Base (as of 6/30/22)

Historical Shareholders

- Robert Taub
- Together Partnership
- Jürgen Hambrecht

International Strategies

US Institutional

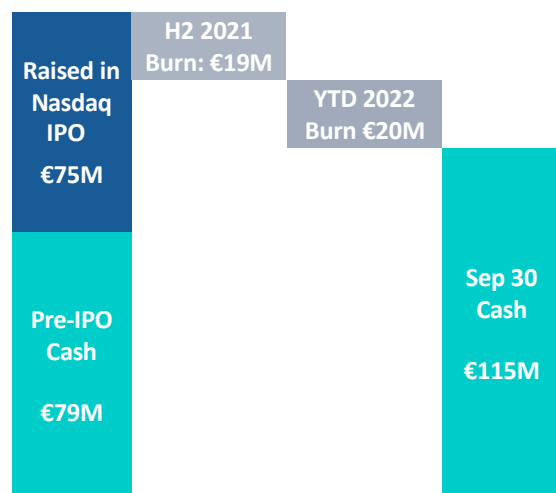

EU Institutional

Strong Cash Position Supports Clinical and Commercial Priorities in 2022 and Beyond

Strong Cash Position - €115M

- R&D/Clinical to represent >60% of 2022 expenses driven by DREAM enrollment completion, EliSA study progress, and ACCESS study commencement
- SG&A drivers include increased commercial efforts in Germany to achieve market leadership and scale-up of corporate functions

Thank you
